Notifications weren't required until Sept. 2016. We had verbal discussions via phone on the need for a demo for Missoula, and then subsequent for any of the other PM10 NAAs they wanted to proceed to redesignate. I considered that adequate initial notification, but, I had the responsibility to document in writing. I will look in my early 2017 e-mails (demo came in May 2017), but I may not have very good documentation. That is something I am trying to improve upon now.

Richard,

Do you know if we ever received an initial notification from MT on the 2015/2016 demonstration? I looked on the G drive and back through emails, and didn't find anything.

Thanks,

Ethan Brown
